PUBLICATION

AAAI — 2004
Evaluating Consistency Algorithms for
Temporal Metric Constraints

Senior Product Designer & Systems Thinker with **15+ years** of experience specializing in AI-empowered enterprise SaaS and complex workflow automation. Proven track record translating ambiguous business requirements into high-trust, scalable products for global leaders like **Roku** and **Sage**. Expert in human-centered AI patterns, leading cross-functional teams from strategy through execution.

EXPERIENCE

Roku

Senior UX Product Designer · San Jose, CA

2021 – Present

- Defined UX strategy for AI-assisted finance operations, creating patterns for transparency and human oversight in automated revenue recognition.
- Architected a "single source of truth" for content ecosystem data, directly improving trust and transparency for executive stakeholders.
- Designed scalable end-to-end workflows for content finance operations across multiple revenue streams, accounting rules, and operational dependencies.
- Improved operational efficiency through workflow automation, streamlined approvals, and clearer financial visibility.
- Led stakeholder reviews, design critiques, and cross-functional workshops to align business and user needs.
- Contributed to design systems, scalable interaction patterns, and UX best practices across enterprise tooling.

Sage

Senior Interaction Designer

2017 – 2021

- Led design for intelligent automation in cloud accounting, reducing manual overhead through smart workflow patterns.
- Designed automated accounting experiences helping users navigate complex financial workflows with clarity and efficiency.
- Conducted user interviews, usability studies, and stakeholder workshops to uncover pain points and validate concepts.
- Collaborated cross-functionally with PMs, engineers, and researchers throughout the product lifecycle.
- Mentored junior designers on Systems Thinking, ensuring UI consistency across a multi-product enterprise platform.

Symantec

Senior User Interaction Designer

2012 – 2017

- Served as creative lead for Symantec Website Security platform redesign initiatives.
- Collaborated with product and engineering to define product vision, roadmap priorities, and usability improvements.
- Designed user stories, process flows, wireframes, and high-fidelity interactive prototypes.
- Conducted usability testing and synthesized customer insights into actionable design recommendations.
- Delivered detailed UX specifications and partnered closely with engineering through implementation.

ADDITIONAL HIGHLIGHTS

ENTERPRISE SAAS DEPTH

Extensive experience designing large-scale internal operational platforms and 0→1 product launches.

SYSTEMS THINKING

Strong approach to simplifying highly complex workflows across multi-stakeholder enterprise environments.

TECHNICAL BACKGROUND

Dual MS degrees (HCI + CS) enable deep collaboration with engineering on technical constraints and feasibility.

STRATEGIC BALANCE

Skilled at weighing user needs, technical constraints, and business priorities in fast-paced environments.
